

Make Richmond a Greenzone!

City Council hearing on making **Richmond a Green Zone**

Problem Communities in Richmond face a deadly combination of pollution, health problems like asthma, and economic problems like unemployment.

Solution Make Richmond a Green Zone — an area where our government prioritizes community solutions to cut pollution, improve health & create jobs.

Take Action! Join us to make Richmond a Green Zone:

Tuesday January 17th 6:00pm
450 Civic Center Plaza
Richmond, CA 94804

Wear GREEN, show your support, and make your voice heard!

If the City Council adopts the recommended “Green Zone” with its General Plan in January, the City will be able to:

- Reduce air pollution instead of allowing it to increase.
- Attract “greener” industry that provides more jobs.
- Provide for more and better public transit.
- Improve environmental health, job opportunities and quality of life for the most vulnerable residents in our communities.
